FRANZIS GmbH has compiled this product with special care. Please note the following provisions:

The individual programs, routines, controls, etc. contained on this data carrier or in this download are copyrighted by their manufacturer or distributor,

controls etc. contained on this data carrier or in this download are protected by copyright by their manufacturer or

program. The purchaser of this software is entitled to use the programs, data or data groups that are not marked as shareware or public domain for his own purposes as intended. The purchaser may use programs or program parts that are marked as shareware, freeware or public domain in accordance with the information contained in the programs or program parts.

information contained in the programs or program parts. Duplication of programs for the purpose of distributing data carriers containing programs is not permitted. The copyright for the selection, arrangement and classification of the programs and data on this data carrier or in this download lies with FRANZIS GmbH.

The data and programs stored on this data carrier or this download have been carefully checked. However, in view of the large number of data and programs, FRANZIS does not guarantee the accuracy of the data and the error-free operation of the programs. The publishers and FRANZIS GmbH assume neither guarantee nor legal responsibility for the use of the individual files and information, for their efficiency or error-free function for a specific purpose.

Furthermore, no guarantee is given that all data, programs, icons, sounds or other files contained therein are freely usable,

sounds or other files are freely usable. Accordingly, the publisher cannot be held liable for the infringement of patent and other rights of third parties. Most

product names of hardware and software as well as company names and company logos mentioned in this work are also registered trademarks and should be regarded as such. The publisher essentially follows the manufacturer's spelling of the product names.
